-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Imiya et al "Inverse Quantization of Digital Binary Images for Resolution Conversion".

As for claim 1, Imiya teaches a method for converting binary image data at a first resolution to binary image data at a second resolution (page 426, abstract), the method comprising: detecting a plurality of edges of the binary image data (page 426, abstract, lines 6-7); sampling a corresponding point substantially near each of the edges (page 426, Introduction, lines 13-18); fitting a curve between the sampled points (page 426, Introduction, lines 18-19); and re-sampling the curve at the second resolution (page 431, Conclusion, lines 7-8).

As to claim 2, Imiya teaches that the first resolution is less than the second resolution (page 431, Conclusion, lines 7-8).

As to claim 3, Imiya teaches that the first resolution is greater than the second resolution (page 431, Conclusion, lines 7-8).

As to claim 4, Imiya teaches that the first resolution is an integer multiple of the second resolution (page 431, Conclusion, lines 7-8).

As to claim 5, Imiya teaches that the first resolution is a non-integer multiple of the second resolution (page 431, Conclusion, lines 7-8).

2. Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Aoyama et al, Loce et al and Lin et al are also cited.

4. The IDS filed on 8/27/03 and 4/11/05 have been considered. Reference 2003/007702 has been crossed out since the Publication Number was incorrect. The correct Publication 2003/0007702 (Aoyama et al) has been cited in the PTO-1449.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yon Couso whose telephone number is (571) 272-7448. The examiner can normally be reached on Monday through Friday from 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jingge Wu, can be reached on (571) 272-7429. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
